Aurélien Verbeke

Engineering student at INP — ENSEEIHT

First-year engineering student at ENSEEIHT, I have been passionate about digital technology and programming for many years, exploring a wide range of languages and technologies.
Curious and driven, I am eager to expand my international experience through a two-month internship (June - July 2025). I would be especially excited to contribute once again to a public service, where my skills could make a tangible and meaningful impact.
